## **cdmNet now fully compatible with Meditech Evo and Communicare versions 14 & 15**

*Posted on Jan 23, 2018*

Precedence is happy to announce that Precedence Connector 5.6.2 is now compatible with Meditech Evo and Communicare versions 14 & 15. This means that cdmNet can now integrate with these systems, expanding the scope of potential clinics to utilise the cdmNet platform.

Communicare is a clinical system used by many Aboriginal Health services and Precedence is proud to deliver a compatible technology. The integration, developed for the Government's Health Care Home trial, will mean that patients managed on these practice softwares can now participate in the program.

## cdmNet now able to create specifically designed Health Care Home care plans for enrolled patients

*Posted on Jan 23, 2018*

We are excited to announce that cdmNet now offers specially designed care plan templates for practices enrolling patients into the government's Health Care Homes trial.

When creating a patient care plan, the option "Health Care Home Care Plan" may now be selected to create a shareable digital care plan for patients enrolled in the trial. Please see the above video for more information.

This new function compliments the Precedence Health Care developed [Health Care Home Risk Stratification Tool](#), which is supplied to all clinics participating in the Health Care Homes trial.

## You can now customise your cdmNet patient record tab menu

*Posted on Jan 23, 2018*

New functionality in cdmNet gives you the option to customise which tabs are displayed across your cdmNet patient record menu, enabling you to hide unwanted or unused options.

The selection list to setup this new functionality is located under the “...” option next to the “Education” tab.

Please contact cdmNet support if you have any questions on 1300 236 638 or email on [support@precedencehealthcare.com](mailto:support@precedencehealthcare.com).
