In safe hands ▶

cdmNet is an online care management solution for healthcare providers and patients that enables better management and coordination of care. It facilitates collaboration and sharing of information amongst the care team and supports patients to better understand and self-manage their own care.
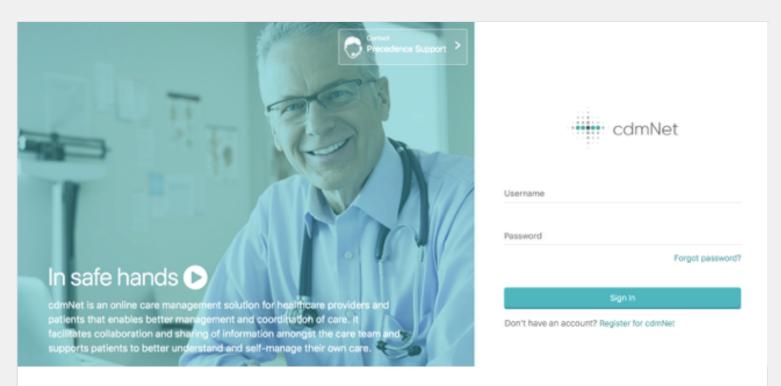

New User Interface in cdmNet

Posted on Mar 21, 2018 09:30 am

Precedence Health Care is excited to announce the upcoming release of our new user interface! Precedence is committed to ensure that every user has a smooth experience using cdmNet. Our developers and design team have been working hard to re-design cdmNet with a fresh new look and an intuitive feel. These enhancements are user-friendly and aim to improve efficiency.

The new interface will be released on the **23rd of March** and is designed to make it easier to navigate cdmNet, including easy to read fonts and colours.

So, whats new?

- Refreshed look and feel
- New login page
- New navigation buttons on the the **Overview** tab
- The **Planning** tab is now called **Care Plan**
- New **Review** tab for easy tracking of due and upcoming tasks
- Turning off Patient Notifications is now under the **Contacts** tab
- Configurable viewing tabs (choose what tabs you want to see)

Head to cdm.net.au **on the 23rd of March to see the new changes!**

## Coming soon to cdmNet

Posted on Mar 21, 2018 09:30 am

Over the next few months we will roll out further user interface updates including:

- Changes to the display of the Care Plan tab to allow simpler viewing and navigation of the care plan
- Extra functionality to the new Review tab, allowing tasks to be marked off as they are completed

We will keep you updated on our new exciting changes!
