via an app

**inca** is a centralised online platform that makes it easy for GPs, allied health practitioners and specialists to collaborate, and provide seamless, integrated care for their shared patients.

## Optimising team-based care **improves quality and safety of care**, and supports better patient outcomes.

**inca** supports integrated care through:

- + Coordination - streamlining Medicare-compliant assessments and automating care plan implementation processes
- + Collaboration - providing a central, shared online space where team members can communicate easily, securely and efficiently
- + Engagement - patients are provided with access to their care plan, health information and progress communication to ensure they are active and engaged

Patients' healthcare needs are increasingly being met by virtual care teams. Inca allows me to instantly distribute key clinical information between all members of a patient's care team. It helps enormously in managing a growing population of chronically ill people with complex health needs.

**Dr. Nathan Pinskiere | GP**

### Pricing and Licenses

The Inca Integrated Care Platform is available in single and multi-license packages starting at **\$69/month for a GP license**. Practice nurses and allied health professionals can use the platform at no cost.
